

GreenHome Georgia, LLC is a Green Building and Energy Consulting firm that specializes in guiding clients through the implementation of energy efficient and green building practices. We work with our clients to design and create a building that is healthier, more comfortable and cost-efficient.

### **Position Summary**

GreenHome Georgia, LLC is seeking a **DET (Duct and Envelope Tightness) Verifier** to join our team and specialize in this important and rapidly evolving aspect of the building industry. This position has the potential to expand with continuing education/certification and successful work performance.

If you are someone looking to enter the 'green' industry, start a new career, or use previous education and experience, this is a great opportunity for you. We are willing to train the right people with the right ambition, initiative, and work ethic.

Successful people in this position have a positive attitude, willingness to learn, and are service focused. Associates will work independently but also sometimes as part of a team.

### **Responsibilities Include:**

- Effective interaction with clients and management, verbally and in writing
- Successful completion of DET tests for assigned properties to the required schedule
- Accurate and timely completion of all required paperwork to the client and management
- Problem solving on site to achieve a high percentage of passed DET tests
- Efficient and effective use of time, meeting expected productivity goals
- Representing GreenHome Georgia's credible brand through behaviors, service levels, and high performance
- Securing and maintaining GreenHome Georgia equipment and resources
- Other duties as assigned when not working in the field

### **The ideal candidate for this position would:**

- Have a valid GA driver's license and a substantially clean driving record
- Have a reliable car, large enough to carry required equipment, and auto insurance
- Have a basic ability to find information on construction drawings and specifications
- Be knowledgeable of current Georgia Building Codes, primarily International Energy Conservation Code (IECC) with Georgia Amendments
- Have a basic knowledge of Microsoft and/or Google Office Suites, and productivity apps such as CamScanner.

- Be organized with strong time management skills
- Be able to communicate effectively, both verbally and in writing
- Be good at math and eager to learn
- Possess a smart phone and be responsive to calls and texts, from both GreenHome Georgia and clients.
- Provide exceptional customer service
- Be capable of completing work on a timely basis
- Be available week days with some early starts and late finishes
- Take strong responsibility for and pride in work results
- Be willing to receive feedback and change behaviors as a result

**Physical requirements include the ability to:**

- Crawl through confined, dark spaces, such as attics and crawlspaces
- Climb ladders and stairs
- Carry and set up equipment up to 50 lbs
- Drive for several hours at a time
- Eye-hand coordination
- Work overhead

**Desired (not required) Accreditations or Designations**

- DET Verifier for Georgia Energy Code
- Building Analyst with BPI
- HERS Rater
- EarthCraft Technical Advisor
- Other designation for the Green Building and Weatherization Industry
